Thursday August 8, 2019

Dear Dr. Leone,

Congratulations on assembling your highly skilled medical team. From the front desk to the back office everyone has treated me with compassion and empathy. Your highly skilled Physician Assistants are also to be commended for their "Five Star" care. Your calm demeanor and positive attitude gave me strength during the entire process. From the pre-surgical consultation to post surgery follow up you kept me mentally focused.

While my case medically was a difficult one, your superlative skills, along with those of your team, prevailed in the end. My outcome has exceeded all my expectations. As the healing process continues, every day is better than the previous one. My only wish is that I did not have this surgery sooner.

My quality of life has improved with greater mobility, eliminating the daily pain I had been dealing with for many years, and you have given me a more positive outlook on life in general. I now have more energy on the job and with my family at home.

Thank you for dealing with my difficulties as a patient and giving me a renewed outlook on life. I can highly recommend you and your organization as our "go to" orthopedic surgeon.

Sincerely,

William "Bill" Pepe
